

1)products listing and sorting

Title:

Reset App State fails to clear items from the cart and reset buttons to "Add to Cart"

steps:

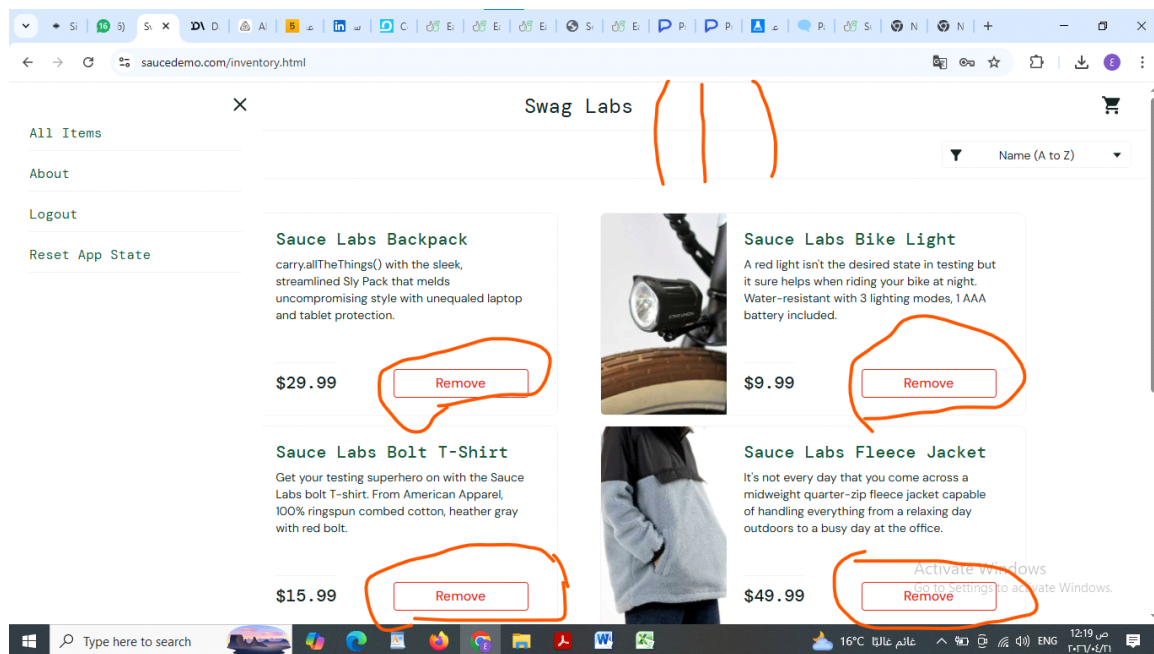

1)open <https://www.saucedemo.com/>

2)open products page

3)Click on the "Reset App State" link.

Description:

Cart items UI not updated to "Add to Cart" after Reset App State .

Result:

Expected result: All items should be removed, the cart badge should disappear and all buttons should revert to "Add to Cart".

Actual result: The products remain in the cart (as shown by the "Remove" buttons) even after clicking "Reset App State".

Severity: medium

Priority: High

2) products listing and sorting

Title:

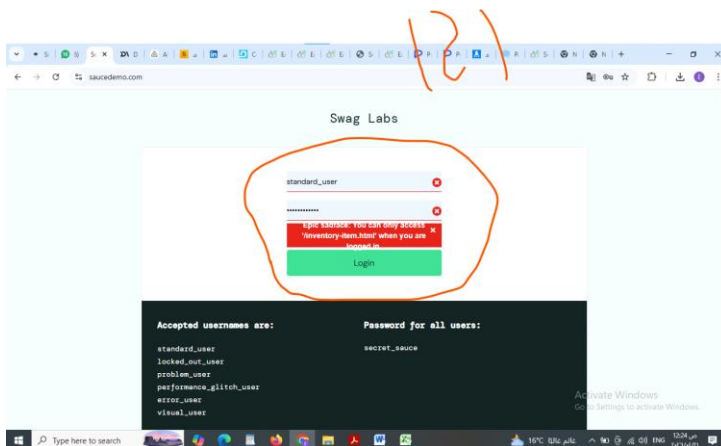

Error message "You can only access '/inventory.html' when you are logged in" appearing during a valid login attempt.

Steps:

- 1)open <https://www.saucedemo.com/>
- 2)open products page
- 3)Locate the Cart Icon in the top right corner of the header
- 4)Click on the Cart Icon.

Description:

When attempting to log in with valid credentials (standard_user), the system fails to redirect to the products page and instead displays a red error message stating that the user must be logged in to access the inventory page.

Result:

Expected result: The user should be successfully authenticated and redirected to the Inventory page

Actual result: The login fails, and an error message appears: "Epic sadface: You can only access '/inventory.html' when you are logged in."

Severity: high

Priority: High

3) products listing and sorting

Title:

Login Blocked: "Access Denied" error message with valid credentials.

steps:

1)open <https://www.saucedemo.com/>

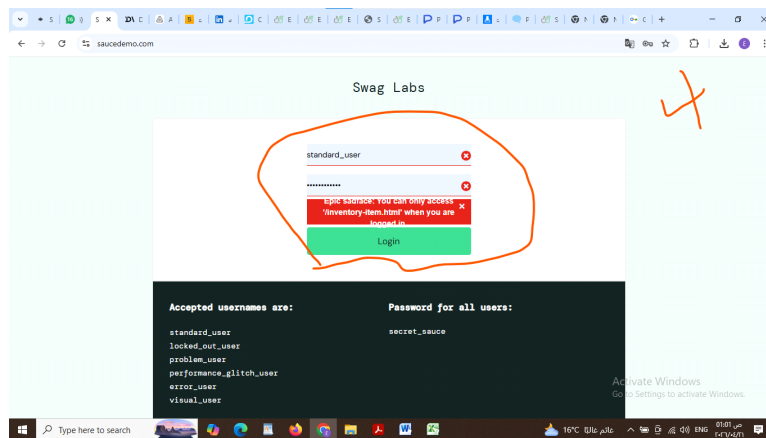

2)open products page

3)Click on any product image in the list.

4) Verify that the application redirects you to the specific "Product Details" page.

Description:

System fails to authenticate `standard_user` and displays an error message stating that the user must be logged in to access `/inventory.html`, preventing access to the app.

Result:

Expected result: Successful login and redirection to the Products page.

Actual result: Error displayed: "Epic sadface: You can only access `'/inventory.html'` when you are logged in."

Severity: high

Priority: High

4) products listing and sorting

Title:

Redirection error after login.

Steps:

1)open <https://www.saucedemo.com/>

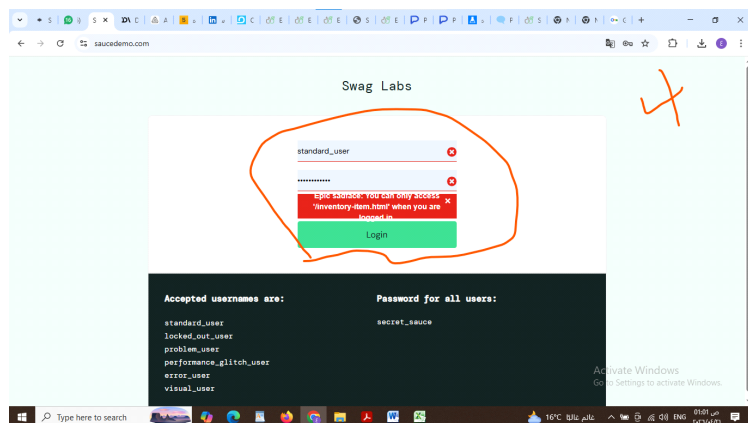

2)open products page

3)Click on the title/name link of any product.

4)Verify the redirection to the Product Details page.

Description:

The system fails to process the login for standard_user and incorrectly triggers an access control error ("You can only access '/inventory.html' when you are logged in"), effectively blocking user access to the dashboard.

Result:

Expected result: User should log in and see the products page.

Actual result: Login fails and shows an "access denied" error.

Severity: high

Priority: High

5)products details

Title:

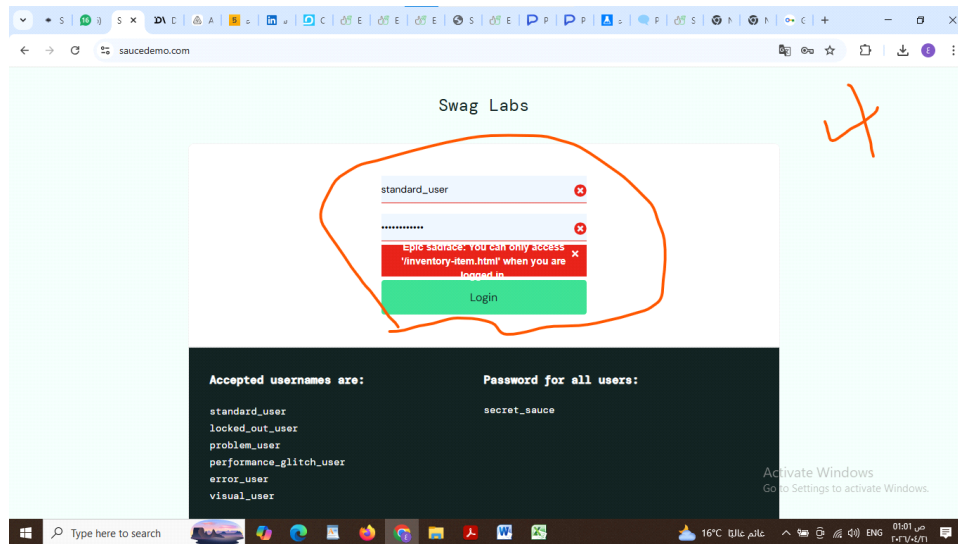

Login failed with valid user.

Steps:

- 1)open <https://www.saucedemo.com/>
- 2)open product page
- 3)Click on a specific product name.
- 4)Observe the product name on the details page.

Description:

The system shows an error and prevents login even when the username and password are correct.

Result:

Expected result: User should go to the products page.

Actual result: Error message appears: "You can only access inventory when you are logged in."

Severity: high

Priority: High

6) products details

Title:

"Back to products" button not working.

Steps:

1)open <https://www.saucedemo.com/>

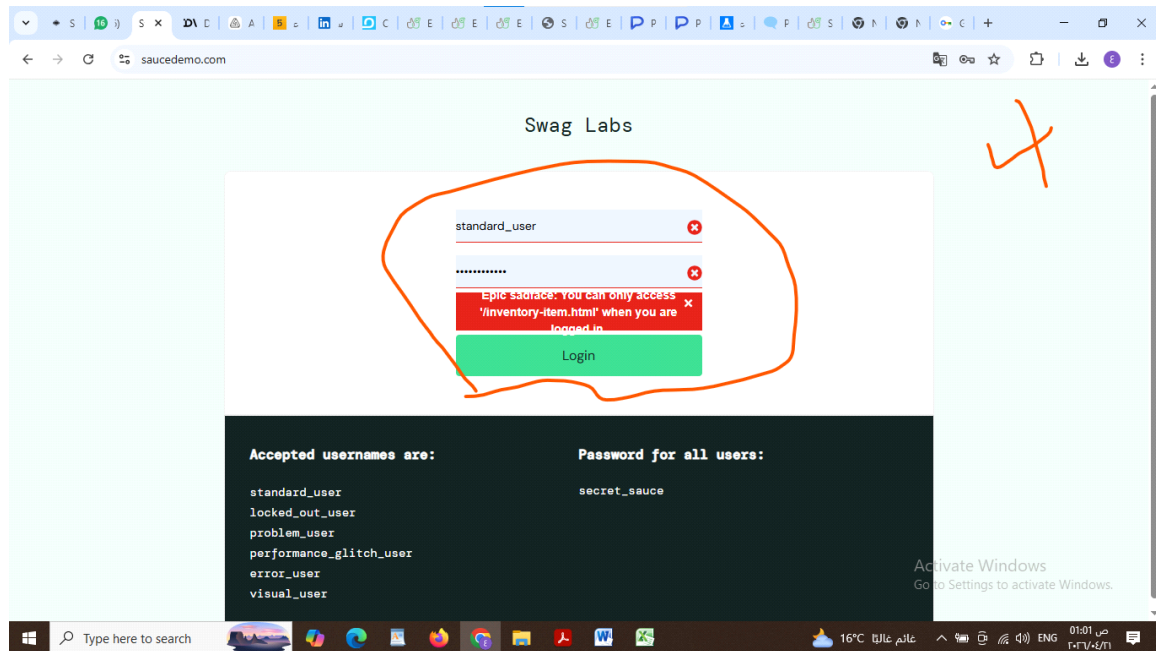

2)open product page

3)Navigate to the product details page.

4)Click on the "Back to products" button..

Description:

Clicking the "Back to products" button on the details page does not redirect the user back to the main products list

Result:

Expected result: Redirection to the main products page

Actual result: The button is clicked but nothing happens, or user stays on the same page.

Severity: medium

Priority: High
